INTRODUCTION

Started coding in 9th grade because I wanted to build things and solve problems. Built solutions for real clients through code and fell in love with product development. Currently active in the open source community and a part of OHCN for GSoC '26. I care about the impact my contributions make and always looking to join a team where my work will actually matter and play a role in improving someone's life.

EXPERIENCE

Google Summer of Code 2026 Contributor

Open Healthcare Network Foundation

May 2026 – Present

Ernakulam, IN (Remote)

- Building the [Instant Messaging Wrapper plugin](#) for Care EMR.

Software Developer

Devkind

Jul 2025 – Feb 2026

Melbourne, AU (Remote)

- Built a plug & play, highly customizable Swell checkout app by integrating Cloudflare KV + Easyblocks into an existing Next.js storefront checkout so anyone could customize and use it without ever touching code.
- Collapsed the 3-step checkout into a single page flow, resulting 35% decrease in checkout to purchase time.
- Sole dev on 6+ client projects end-to-end: designing, building and deploying within tight deadlines.
- Onboarded an intern, helped assign tasks, did code reviews and provided prompt guidance.

Developer Intern

Devkind

Mar 2025 – Jun 2025

Melbourne, AU (Remote)

- Revamped an old site from scratch with measurable improvements in core web vitals, organic traffic and conversion rates.
- Built a shared prompt database for the team, standardized AI prompting and cut API token costs by 30%.
- Automated marketing workflows and leads generation using N8N + Slack, saving 10+ hours of manual work per week.

Freelance Developer

Samiullah Arif Enterprises (SAE)

Nov 2024 – Apr 2025

Sukkur, PK (Remote)

- Replaced pen-and-paper invoicing with a Django + Next.js system that has processed 20M+ PKR in transactions.
- Shipped 4+ new features in under 30 days based on direct client feedback, iterating fast on a live product.

EDUCATION

Intermediate: Islamia Government Science College, Sukkur

Computer Science

Aug 2024 – Expected 2026

HSC-I: A (78.55%)
